

## **Assembly Bill No. 530**

### **CHAPTER 684**

An act to add Chapter 6 (commencing with Section 32622) to Division 22.8 of the Public Resources Code, relating to the Los Angeles River.

[Approved by Governor October 9, 2015. Filed with  
Secretary of State October 9, 2015.]

#### **LEGISLATIVE COUNSEL'S DIGEST**

**AB 530, Rendon. Lower Los Angeles River Working Group.**

Existing law provides for the protection, enhancement, and restoration of rivers in this state. Existing law establishes the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy for the purpose of, among others, providing for the public's enjoyment and enhancement of recreational and education experiences on public lands in the San Gabriel Watershed and Lower Los Angeles River.

This bill would require the Secretary of the Natural Resources Agency to appoint, in consultation with the Los Angeles County Board of Supervisors to the extent the board wishes to consult, a local working group to develop a revitalization plan for the Lower Los Angeles River watershed, called the Lower Los Angeles River Working Group. The bill would require the secretary to consider requests from local agency representatives to participate in the working group and would authorize the working group to include specified representatives. The bill would require, by March 1, 2017, the working group to develop, through watershed-based planning methods, a revitalization plan that addresses the unique and diverse needs of the Lower Los Angeles River, that is consistent with, enhances, and is authorized to be incorporated into the County of Los Angeles's Master Plan, and that includes watershed education programs. The bill would require the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy to provide any necessary staffing to assist the working group.

This bill would make legislative findings and declarations as to the necessity of a special statute for the Lower Los Angeles River.

*The people of the State of California do enact as follows:*

**SECTION 1.** The Legislature finds and declares all of the following:

(a) The Los Angeles River has a complex ecological and political history. The river originally ran freely along an alluvial flood plain, which today is the City of Los Angeles. In the 1930s, destructive flooding led the United States Army Corps of Engineers to design and build facilities to minimize the impacts of future floods, a process that included lining most of the river

with concrete. Since then, the city, county, and federal government have all played a role in restoring the Los Angeles River, including the county's 1996 adoption of a master plan for developing and restoring the entire Los Angeles River. The City of Los Angeles developed a "revitalization plan" to restore the Upper Los Angeles River, which lies within the city's boundaries. Most recently, the Corps of Engineers approved "Alternative 20," a substantial restoration and infrastructure project along the Upper Los Angeles River.

(b) The City of Los Angeles was given responsibility for managing the river's resources through a charter by the King of Spain at the end of the 18th century. After serious floods in the 1930s, the federal government, through the United States Army Corps of Engineers, stepped in to take responsibility for building and managing infrastructure projects to reduce the risk and damage from flooding, with the county as the local partner. The county also works with the city in managing the Upper Los Angeles River, where court decisions have held that the King of Spain's charter gives the city "pueblo" water rights with authority to manage the Upper Los Angeles River's resources. The courts have not given the city authority over the Lower Los Angeles River.

(c) The State of California retains its sovereign authority to manage the rivers within its boundaries, including the Los Angeles River. Historically, however, it has not exercised that authority, due to the dominance of the United States Army Corps of Engineers in partnership with the county. The county's master plan addresses the entire river but is close to two decades old, and would benefit from renewed attention to resources and development, especially on the lower river. The Lower Los Angeles River passes through many cities, but not one of these cities has the responsibility and the resources to invest in restoration of that part of the Los Angeles River. There is therefore opportunity and need for the state to aid in the development and implementation of the county's Master Plan, especially for the Lower Los Angeles River.

(d) In 2014, California voters approved the Water Quality, Supply, and Infrastructure Improvement Act of 2014, which included \$60 million for the Los Angeles River, authorizing funding for both the Santa Monica Mountains Conservancy, which has responsibility for the Upper Los Angeles River, and the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy, which has responsibility for the Lower Los Angeles River. The Water Quality, Supply, and Infrastructure Improvement Act of 2014 allocated \$30 million to each conservancy for the purpose of multibenefit water quality, water supply, and watershed protection and restoration projects for the watersheds.

SEC. 2. Chapter 6 (commencing with Section 32622) is added to Division 22.8 of the Public Resources Code, to read:

## CHAPTER 6. LOWER LOS ANGELES RIVER WORKING GROUP

32622. (a) The Secretary of the Natural Resources Agency shall appoint, in consultation with the Los Angeles County Board of Supervisors to the extent that the board wishes to consult, a local working group to develop a revitalization plan for the Lower Los Angeles River watershed, called the Lower Los Angeles River Working Group. The secretary shall consider requests from local agency representatives to participate in the working group. The working group may include, but need not be limited to, representatives from the conservancy, the County of Los Angeles, the Gateway Cities Council of Governments, the Los Angeles Gateway Region Integrated Regional Water Management Joint Powers Authority, elected officials of the cities riparian to the Los Angeles River, and nonprofit organizations serving the Los Angeles River region.

(b) On or before March 1, 2017, the working group shall develop, through watershed-based planning methods, a revitalization plan that addresses the unique and diverse needs of the Lower Los Angeles River and the communities through which it passes. The plan shall be consistent with and enhance, and may be incorporated into, the County of Los Angeles's Master Plan for the entire Los Angeles River. The plan shall include watershed education programs that help the Los Angeles River communities recognize the value of the river and the importance of protecting the river's watershed resources and its vitality to their communities.

(c) The conservancy shall provide any necessary staffing to the working group to assist in the development of the plan.

(d) The development and implementation of the revitalization plan may be eligible for funding from any public or private source, including, but not limited to, funding pursuant to Section 79735 of the Water Code. Entities that are eligible to implement the revitalization plan include, but are not limited to, state agencies, local agencies, and nonprofit organizations, and may be eligible for state funding.

SEC. 3. The Legislature finds and declares that a special law is necessary and that a general law cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution because of the Lower Los Angeles River's complex ecological and political history and the unique obstacles the local governments of the Lower Los Angeles River encounter when managing the river and its surrounding areas.
